Secure your space with these
trusted communication solutions

AIPHONE®

Flexible solutions to help you save, from a brand you can trust.

For over 50 years, Aiphone intercoms have been the brand trusted by security professionals.

Save money by using an Aiphone intercom system for both emergency and basic communication needs. Intercoms have no recurring expenses or licensing fees. Plus, Aiphone intercom systems integrate with other security peripherals to create an efficient SOC (security operations center).

$0 Zero Annual Licensing Fees
Save money long term by avoiding hidden or recurring expenses.

No Added Server Costs
Avoid additional server equipment charges and maintenance expenses.

Variety of Enclosures
With modular towers and wall boxes, Aiphone has a solution for your facility.

Emergency Products Designed to be Accessible by All

To guarantee everyone can call for help, Aiphone towers and wall boxes comply with the following ADA standards:

- Raised station lettering on emergency call stations
- Braille signage
- Call-station indicator light
- Proper call button mounting height on towers
- Blue light flashes during an emergency call-in to bring attention to the situation
- Thin wall-box design provides clearance for mounting heights above 27" from floor

Securing People Includes Having the Proper Protections

Aiphone towers and wall boxes now include an integrated UL Listed electrical box.

- Easily install properly rated electrical outlet inside unit to power peripherals
- Comply with local electrical building codes

## Widen your Viewing Area with a CCTV Camera

With both intercom and CCTV camera views, security personnel can quickly determine the best response for an unfolding situation.

- Now install a secondary camera atop new towers
- Create an additional line of sight

Save Money with Modular-Tower Design
Aiphone's unique design keeps project costs low.

Smaller, segmented shipments reduce freight costs

No crane rentals needed to move modules around

Easy to replace a single damaged module versus whole tower

Reduce Installation Times
Quickly attach power supplies or accessories.
- Both upper- and lower-tower modules include built-in, threaded studs to quickly install or mount additional products, such as a power supply or relay

Easily fish wire through tower.
- Rear access panels on the back of each tower module make it easy to route wires up and down the tower
- Security screws keep access panels locked onto tower modules after installation is complete

Select the Best Aiphone Intercom System for Your Needs

Aiphone has two specialized intercom systems for emergency communication. The IX Series is ideal for facilities looking for a peer-to-peer network solution. The IS Series is best for those who prefer a system that does not require a network.

Already have towers or wall boxes installed from another manufacturer? Use Aiphone's MB-RF1 mounting bracket to retrofit IX Series or IS Series emergency stations into many existing enclosures.	IX Series Network-Based Intercom System	IS Series Hardwired Intercom System
